

Directions: Color some lines and designs on the top 1" and the 1" left hand side of the square. Cut the square out. Turn the paper upside down. Place a pencil on the corner of the square where there is no stripes/designs. Start to roll the paper around the pencil. When all rolled up, slide the pencil out. Tape the last edge of the paper so that the paper does not unroll. Take your pencil and roll the top over the paper to make the rounded part of the top of the candy cane.
